THE WINNING TRIFECTA

Over the last five years the Internet has grown with information and data, making it possible for the average person to benefit from three publications that were published in 1994, 1999, and 2001. The first publication in this 'winning trifecta' is Breeders' Cup Winners. This publication originally sold for USD\$500.00. The pedigree of the horse, along with the birth data was needed in order to win.

Today, you can get up to nine generations of bloodlines at www.dmtc.com/pedigree/?horse=ARCTC_PRIZE. At the bottom of the page, all you do is enter the horses name and how many generations you want to go back. The birth data of the horse is available at Cindy Pierson's website at www.horse-races.net. The Breeders' Cup site at www.ntra.com.

Equibase's horse racing program lists the birth date of each horse at www.equibase.com. The astro chart is also a requirement in order to project the winners. You can set up a free chart at www.astro.com. When you get to this site, on the left sidebar find and click **Free Charts**. Then, click the **Please Click Here** link in the yellow box. Fill in all data, and click on **Continue** twice, then click on Chart Drawing and Ascendant.

The chart will be drawn up for you, and you will have the degrees for the midheaven and ascendent. You will need to set up a chart for the time of each race. You can also download a free program at www.magitech.com/~cruiser1/astrolog.htm. You can also download a free astro clock program that consistently gives you the current chart minute by minute from www.vega.co.za/astro/FreeClock.htm.

Number two in the winning trifecta is the Greyhound Night of Stars. You can download free programs and information from <http://my.execpc.com/~dgpsimul/nos/noshome.htm>. The bloodline information is available from www.greyhound-data.com. This is all the information you would need for the Greyhound Night of Stars. The third publication of the 'winning trifecta' is the Mercury Connection. This was a chapter in a book, published in 1995, *35 Years of Research and Developemnent*.

You will need to back track the results in four-week segments. For horses, this information is available from Equibase by clicking on Results. For greyhound racing, you'll need to go to www.rosnet2000.com. Click on **Programs Results Replay**. Once you get to that page, the calendar to the right, you click on the date, and whether it's an afternoon or evening performance, next you click on the track that you want, and then **Race Chart**. To go back to a previous month, you use the two arrows on either of the month to move forward or backward. -- and this makes up your winning trifecta.

BREEDERS' CUP WINNERS

The Breeders' Cup has become the biggest event in horse racing, surpassing the excitement of the Triple Crown races. To win this race, the horse must possess a bloodline of speed and stamina. Combined with the astrological aspects to trigger the DNA. From the birth chart, I like to see a horse that has Mars trine the sun, moon, or Jupiter, also a conjunction with the moon or Sun.

Mars in the first house is the best placement for speed, and Jupiter in the first house is the best place for stamina. Mars rules over speed, and Jupiter...stamina, this is the reason, anytime you have a top bloodline and transiting Jupiter in trine or conjunct aspect, to natal Mars, that horse will usually win the race. A good example of this is the last few years of the Kentucky Derby - on May 7, 1994, with Jupiter eight degrees of Scorpio, the only horse in the race with the trine was *Go For Gin*, born April 18, 1991, with Mars at eight degrees of Cancer.

On May 6, 1995, Jupiter, 13 degrees of Sagittarius, the only horse in the race with a trine aspect was *Thunder Gulch*, born May 23, 1992 with Mars at 13 degrees of Aries. May 4, 1996, Jupiter at 17 degrees of Capricorn, the only horse in the race with a strong conjunction was *Grindstone*, born January 23, 1993.

Also conjunct was his natal moon and Uranus. Then on May 3, 1997, Jupiter, 19 degrees of Aquarius, the only horse in the race with a conjunction was *Silver Charm*, born February 22, 1994 with natal Mars at 19 degrees of Aquarius. All of the above horses won. This aspect has given me a lot of keys in the Breeders' Cup races.

The other astrological factors that pertain to the horses ability to win is transit Mars trine, conjunct, semi-sextile, biquintile, or opposition to natal Mars. Mars semi-sextile, biquintile to natal Jupiter. Transiting Jupiter, semi-sextile, square, or trine natal Mars. Jupiter, square, trine or opposition to natal Jupiter.

When you combine the bloodline with the transits, you have combinations that are 100% accurate. One pattern that has been 100% accurate over the last 15 years with 52 wins from the 105 Breeders' Cup races, is using *Phalaris*, a horse that was born in 1913, and has been considered the transmitter of speed. His bloodline consists of the top Sires, racing in the Breeders' Cup today...such as *Northern Dancer*, *Bold Ruler*, and *Raise A Native*.

If a horse goes back to *Phalaris*, along it's sire line that reaches back to *Phalaris*, this horse is considered a *Phalaris* sire line. If it does not go back to *Phalaris*, it is said to be a non-*Phalaris* sire line. A non-*Phalaris* sire line is considered to have more stamina. Every time the astro horse had a *Phalaris* side and a non-*Phalaris* side, they won the Breeders' Cup race they were entered in.

In 1987, there was an astro *Phalaris* and non-*Phalaris* in every race, giving us the pick-7. In reviewing some of the sire lines from each Breeders' Cup race over the last 15 years, in the **Turf**, seven of the winners came from *Northern Dancer*, three from *Nasrullah*, and the other five from *Native Dancer*, *Bold Ruler*, *Turn To*, *Ribot*, *Buck Passer*. In the **Mile**, ten winners came from *Northern Dancer*, two from *Mr. Prospector*, the other three, *Nasrullah*, *Turn To*, and *Tourbillion*.

In the **Juvenile**, four winners from *Mr. Prospector*, three from *Bold Ruler*, two from *Damascus*,

the other six from *Northern Dancer*, *Princequillo*, *Nasrullah*, *Turn To*, *Nearctic*, *Royal Charger*. **Juvenile Fillies**, five from *Northern Dancer*, two from *Raise A Native*, two from *Princequillo*, the others from *Turn To*, *Nasrullah*, *Ribot*, *Mr. Prospector*, *Nearctic*. **Sprint**, five from *Northern Dancer*, two from *Mr. Prospector*, two from *Nasrullah*, the others from *Ribot*, *Turn To*, *Bold Ruler*, *Nearctic*, *In Reality*, and *Tourbillion*. **The Classic**, three from *Northern Dancer*, two from *Mr. Prospector*, the other ten from *Nearctic*, *Ribot*, *In Reality*, *Raise A Native*, *Turn To*, *Bold Ruler*, *Damascus*, *Nasrullah*, *Tourbillion*, and *Domino*.

When preparing for the Breeders' Cup races, I make note of all the horses that have the strongest blood line based on the natal chart, these are the horses that I rate the strongest, then I determine how many of these horse are in the blood line. The following are the astro horses that qualify.

- | | | |
|-------------------------|-------------------------|-------------------------|
| - <i>Apalachee</i> | - <i>Kings Bishop</i> | - <i>Ribot</i> |
| - <i>Baldski</i> | - <i>Mr. Prospector</i> | - <i>Roman</i> |
| - <i>Blushing</i> | - <i>Nasrullah</i> | - <i>Royal Charger</i> |
| - <i>Groom</i> | - <i>Native Dancer</i> | - <i>Seattle Slew</i> |
| - <i>Bold Ruler</i> | - <i>Nearco</i> | - <i>Sir Cosmo</i> |
| - <i>British Empire</i> | - <i>Never Been</i> | - <i>Speak John</i> |
| - <i>Buck Passer</i> | - <i>Northern</i> | - <i>Spy Song</i> |
| - <i>Court Marshal</i> | - <i>Dancer</i> | - <i>Tourbillion</i> |
| - <i>Damascus</i> | - <i>Panorama</i> | - <i>Tudor Minstrel</i> |

| - <i>Gallant Man</i> | - <i>Phalaris</i> | - <i>Ultimus</i> |
| - <i>Halo</i> | - <i>Pharis II</i> | |
| - <i>Icecapade</i> | - <i>Pompey</i> | |
| - <i>In Reality</i> | - <i>Princequillo</i> | |
| - <i>Key To The</i> | - <i>Raise A Native</i> | |
| - <i>Mint</i> | | |

RED, GREEN, AND YELLOW

The chart will tell you where the winner will mostly like come from. Green, is from the top three morning line favorites; Red is from the top three horses with the highest morning line odds, and the yellow is everything else in between. If you have an eight horse race, you will have two yellows, in a nine horse race, three yellows...etc. The Breeders' Cup is run on a Saturday, making each planetary segment the same from sunrise to sunset. The Planetary segment table will give you the time for each segment.

The Mercury segment is green. The jockey is a key factor to the winning horse. If a clever jockey is riding a red horse, include this horse in the win bet, along with the best green. With a moon segment, keep your eye on the tote board. The horse that has the largest percent drop, five minutes before the race, would be the key factor, along with a red horse. In the Saturn segment, the winner is generally a closer, and the color is green. Include a red horse that is a strong closer. The Jupiter segment is all green. Generally, the largest horse of the green is the winner, except in a turf race. In the Mars segment, speed is the key word, and green is the color. In the sun segment, yellow is the color, and generally the public's choice will follow in second. It is often that a male horse ends up the winners's circle. In the Venus segment, this is also yellow, followed by a green. In a turf race, horses with small feet should be omitted.

The only time that this is altered is when the degree on the mid-heaven or ascendent indicates otherwise. The formula for projecting a long shot is zero degrees on the ascendent or mid-heaven, zero degrees of a planet, or the part of fortune. The zero degrees are dominate in the signs of Aries, Taurus, and Gemini. Two to three degrees of Aquarius on the ascendent also produces long shots. The mid-heaven at one degree of Sagittarius, 16 and 17 degrees of Scorpio-Capricorn, 28 degrees of Scorpio-Sagittarius, five to eight degrees of Sagittarius, 14 degrees of Capricorn.

If Saturn is in the fifth house, squared, conjunct, or oppositioned the moon, these are all red indicators. If the ascendent is 17 or 18 degrees of Pisces, mid-heaven at one, nine, 16 to 19 degrees of Capricorn, these are yellow indicators. If the ascendent is six, 12, 18, or 24 degrees of any sign, this would be a green indicator. The final step is to determine if the horse has been able to win under the sign that the moon is in on the day of the race, or under the aspect between the sun and moon on racing day. The following is a planetary table for the time segments for the tracks hosting the Breeders' Cup, along with the astro horses birth dates for the next ten years that qualify to win.

In preparing for the Breeders' Cup races, I make note of whether the race is green, yellow, or red. I then check if any of the astro horses are in this group. I then check the sire line to determine which one of the qualifiers are the strongest. I always project two winners, and then determine the exacta, trifecta, and superfecta. In the pick-7, I select a key using the top two, this will cost \$128.00.

From **Brisnet**, you can get the bloodline of the horse. There are free services on the Internet that will let you construct a chart for the Breeders' Cup. In forecasting the Breeders' Cup for the next ten years, from the tables, you will have a list of the birth dates that are considered to be the astro horses. If a Phalaris and non-Phalaris horse are among them, this combination has had an accuracy of 100%. Also, if there is an astro horse in the color code, you would also use that

horse as a winner.

If there are no astro horses in the race, then you would go to the secondary tables that are based upon sun, moon and Venus. You would first look up the code for the date of the Breeders' Cup, then find the horse that would qualify, the Breeders' Cup of 1999 would be held on Nov. 6, which would equal an 'A'. The following table consists of code numbers for A, B, C, and D.

A = 9-1-5-2-6-10-4-8-12-11-7-3

B = 10-2-6-3-7-11-9-1-5-4-12-8

C = 3-7-11-4-8-12-2-6-9-5-1-10

D = 8-4-12-1-9-5-11-7-3-6-2-10

The probable dates of the Breeders' Cup usually fall on the last week of October or the first week of November. The following are the dates and the code to the above table.

1999 - 11/06 = A

2000 - 10/28 = D 11/04 = C

2001 - 10/27 = D 11/03 = C

2002 - 10/26 = D 11/02 = C

2003 - 10/25 = B 11/01 = C

2004 - 10/30 = C 11/06 = A

2005 - 10/29 = B 11/05 = A

2006 - 10/28 = B 11/04 = A

2007 - 10/27 = B 11/03 = A

2008 - 10/25 = B 11/01 = A

The next step is to get the horses birth date, the Breeders' Cup website along with about.horseracing.com furnishes this information. Use the following tables for the horses year of birth.

Born

A '92/'00

B '93/'01

C '94/'02

D '95/'03

E '96/'04

F '97/'05

G '98/'06

H '99/'07

Let's say it's November 6, 1999, and we know that this equals an 'A'. The top three numbers are 1, 5, and 9. Horses born in 1997, that would qualify, we would look to table 'F'. Looking at #9, horses born on January 6 and 7, February 2 and 3, March 1-3, and 29-30, April 25 and 26, May 22 and 23 would be secondary, the same with the horses with one and five. If I have two horses in the green, and have to leave out one, it would be the one with the worst rating.

TABLE A

REVIEWING PAST BREEDERS' CUP RACES

In 1984, on November 10, the first Breeders' Cup came to us from Hollywood, CA. There were two P-Factors, and both astros from the **Juvenile Fillies** race, *Fran's Valentine*, and *Outstandingly*. They were both astros. Fran's Valentine won, but was disqualified, giving Outstandingly the win, paying \$47.60 to win. Six of the seven races were astro horses, of these astro horses, we had five that were P-Factors. *Princess Rooney*, *Royal Heroine*, *Lashkari*, *Wild Again*. All of the P-Factors won. We ended up with six of seven in the pick-7.

November 2, 1985, we only had four races that qualified as astro. Of these four races, we had three P-Factors in the astro group. They were *Life's Magic*, *Cozzene*, and *Pebbles*. All of the P-Factors won, along with the astros. November 1, 1986, we had four astro races that qualified, and of those, from the astro horses we only had three with the P-Factor, *Smile*, *Manila*, and *Skywalker*.

These horses kept up with the 100% aspect by winning. November 21, 1987, we had two to four astros in every race, but only one P-Factor from the astros in each race. Those horses were *Ferdinand*, *Theatrical*, *Very Subtle*, *Success Express*, *Epitome*, *Misque*, and *Sacahuista*. For a \$2.00 ticket, the pick-7 was yours, as everyone of the astro P-Factors won the race.

November 5, 1988, there were five races with astro horses. Those astro horses with the P-Factor were *Gulch*, *Misque*, *Open Mind*, and *Great Communicator*. Only the astro horses with the P-Factor won. November 4, 1989, there were six races with astro horses those astro horses with the P-Factor were *Sunday Silence*, *Prized*, *Steinlen*. All of the P-Factors won, along with the astro horses, giving us six of seven.

By October 27, 1990, we've hit the highest paying exacta, win, and quinela. With this Breeders' Cup at Belmont, they were introducing the Triple, which is a trifecta bet. In the **Classic**, the astros were *Unbridled*, *Ibnbey-En*, *Thirty Six Red*, *Lively One*, and *Opening Verse*. Unbridled was the astro horse with the P-Factor. We keyed him over the other qualifiers, and hit the highest paying Triple on record.

The 1-3-4, \$2.00 payoff, \$6,375.00. There were six races with astro horses, of those astro horses, the P-Factors were *Royal Academy*, *Meadow Star*, *Fly So Free*, *Unbridled*. They all won, plus two of the other astros, giving us six of seven.

In 1991, the astro horses with the P-Factor were *Black Tie Affair*, *Pleasant Stage*, *Opening Verse*, *Miss Alleged*, and *Sheikh Albadou*. Also, let me take you into their performances. *Safety Kept*, was not a P-Factor, but was an astro horse. Prior to the race itself, he was scratched, leaving the other astro horse, who did have a P-Factor - his name...*Sheikh Albadou*. This astro horse paid \$54.60 to win.

In the **Juvenile Fillies** race, *Peach* was one astro horse. *Pleasant Stage* was the astro horse with the P-Factor, and won the race. In the **Distaff**, *Dance Smartly* won at 45 degrees back on

September 15, 1990, and also had the best aspects to win, as it was a green segment.

In the **Mile, Opening Verse** - a P-Factor - also won with the moon in Virgo on April 24, 1991. This horse paid \$55.40 to win. In the **Juvenile**, there were no P-Factors in the astros. **Arazi** won on October 5, 1991 with the moon in Virgo - also at a 45 degree angle. The race prior to that on September 8, 1991 with the moon in Virgo, this horse also fit into the segment qualification, and did show that he was superior in the race. **Devil On Ice** was the other qualifier, but could not compare to Arazi.

In the **Turf, Itsallgreetome** was an astro horse. The P-Factor was a horse by the name of **Miss Alleged**, which was also an astro factor. A decision to use Itsallgreetome cost the pick-7, Miss Alleged went on to win paying \$86.20, by 1.5 lengths over Itsallgreetome. The lesson learned here was never to leave out an astro with a P-Factor.

In the **Classic, Black Tie Affair** was a P-Factor. Black Tie Affair won, making the six of seven consolation payoff, \$235,901.60 to the 29 winners. Our subscribers were still very happy with the results, although we made the bad decision of leaving out a P-Factor.

October 1, 1992, many of the races had too many astro horse qualifiers. There were only three astro horses with the P-Factor, they were **Fraise, Gilded Time, and Thirty Slews**...and they all won. October 6, 1993, we still continue to hold the record for the highest paying trifecta, exacta, quinela. This year, we did not have much of a selection to pick from. The only astros with the P-Factor were **Arcangues** and **Kotashaan**.

There were a few favorites that were standouts that made the races easy to predict, but it was our astro P-Factor horse, Arcangues, that gave us a new record for the highest paying win price of \$269.20. November 5, 1994, the only astro horse with the P-Factor were **Tikkanen, Flanders, and One Dreamer**...and they all won their races. On October 28, 1995, we only had two horses that were P-Factor astros...and they were **Ridgewood Pearl** and **Desert Stormer**.

At Orlando, Florida we have to bet through the Calder Race Course hub. So, were unable to get the Breeders' Cup payoffs from the host track of the Breeders' Cup. But 1995 gave us the opportunity to hit the largest trifecta payoff at a simulcast track. The Sprint was the fourth race at Calder.

The astro horses were numbers 6 and 12. Desert Stormer was #13, but any horse in the field would be considered #12 on the ticket. By taking the 6-12 with the other qualifiers, the ticket cost \$45.00, and the \$2.00 wager paid \$5,363.40.

You can see from the results at Calder that we did hit the pick-7 with every winner in each race. The astros were as follows...Juvenile Fillies: 3-9; Sprint: 6-12; Distaff: 1-8; Mile: 2-4; Juvenile: 6-11; Turf: 2-11; Classic: 7-10.

October 26, 1996, the P-Factor continued to be 100%. There were only three astros with the P-Factor in 1996, they were **Da Hoss, Jewel Princess, and Alphabet Soup** and were used as a key in the pick-7. They all won, along with the other astros, just missing the pick-7, but subscribers like Norvin Kile were still happy to get the \$4,751.00 consolation. October 8, 1997, we only had two horses with the P-Factor that were astros, and they were **Skip Away, and Favorite Tricks**. October 7, 1998, the Breeders' Cup would introduce the Superfecta to the wagering. This year there were only three P-Factor astros, they were **Da Hoss, Bucks Boy, and Silver Bullet Day**,

which were used as keys in the Pick-6.

In the Sprint, I had four astros that stood out. *Kona Gold, Gold Land, Grand Slam, and Reraise*. This was a good superfecta box. We were able to hit every superfecta, giving us a new record for hitting the highest superfecta ever, in the Breeders' Cup. The Sprint was the 11th race at Calder. It came in 3-14-8-10...the \$1.00 payoff...\$22,386.90. At Churchill Downs, the payoff was \$29,212.00. A difference of \$6,825.10, that it cost, by having to play from the Calder pools. I hope, someday, that they change this rule.

To show you the importance of the astro horse. While finishing up this publication, I decided to take a break today...January 6, 1999...and go to the track. As you can see from my Aqueduct ticket, using the two keys, I was able to hit the pick-6, and then that evening, playing the twi-tri at the Sanford-Orlando Kennel Club, using the two greens. Don't be confused by the 1998 W-2s, the track didn't get the '99s in yet, and had to use the '98s. You can see the importance of the astro horse.

Records are made to be broken, and I hope this publication helps you to break all my existing Breeders' Cup records.

THE GREYHOUND NIGHT OF STARS

The Inaugural Greyhound Night of Stars meet was on Nov. 14, 1997. This event is the Breeders' Cup of Greyhound Racing, where speed and stamina is needed to win, like past generations from Akabar and Big Whizzer. Some of the fastest greyhounds today can be traced back to these two sires. The top ten bloodlines currently are:

1. Oswald Cobblepot
2. Molotov
3. Fantastic Memory
4. Grey's Statesman
5. Gable Dodge
6. Scott Free
7. Wigwam
8. Unruly Thomas
9. EJ's Douglas
10. WW Time Warp

The best A class greyhounds from all over the U.S. at different tracks are joined for this event. The program selections from each of these tracks hold a better than 80% accuracy with the winner coming from the top four selections. My wagering strategy for the Night of Stars races is select two greyhounds from 1-4, and two from 5-8, based on the selections from the program. Then, using the astrological data to determine the winning team. The selections in the program will do most of the work for you. Looking at the program for Nov. 3, 2001. Race one...2517; race two...2175; race three...8623; race four...4157; race five...1485; race nine...7542; race ten...4852; race 12...7281. This leaves seven races to work on.

To date, I've been able to hold the record for the largest win, exacta, trifecta, superfecta payoff. To illustrate how the selections are made, let me use the two highest paying superfectas for Nov. 3, 2001. In race six, the selections...2-4-8-3. I need to select two greyhounds from the 2-3-4. In order to do this, I take the win percentage of each greyhound. Number two is 63.36; number three is 17.30; number four, 15.09. This makes #2 and #3 the team from the inside. From the outside position (5-8), I have #8, and now have to find another number to go with it, number 5's percent of wins, 21.05; #6, 32.25; #7, 29.41. This makes number six the number that will go with number 8.

The sixth race usually indicates a yellow or red will win, which gives number three the go. The astro is July and August - number two is July. At the time of the race, the ascendant is at 19 of Cancer. This puts the Mars and the sun of the July dog on the ascendant. The breeding also leans toward number two, this makes #2 and #3 my winning team. In playing a superfecta, I leave one green and one red out, and that was #4 and #5, my superfecta ticket would look like this...23/123678/123678/123678. This comes out to be a \$120.00 bet. The result...3862, paying \$9,777.00, this was the whole pool, the \$1.00 ticket paid \$4,888.50.

This bet could've also been played in a \$24.00 box with the two insides and two outsides. Some of the notes in my program was the total percentage of each greyhound in the money. Number

Rows 1-8 contain race details for various greyhounds including Ubet I Can Fly, Okie Shelton, Greys Backstaber, Okie Larry, Tom S Scamper, Miz Judy Dee, Dc's Empress, and Sh's Andretti.

4-1-5-2

TAKE HOME A STAR TONIGHT GREYHOUND ADOPTIONS 1-800-366-1472

two was 95.45%, making it an ideal key, which would've brought the bet down to almost nothing. Generally, the top pick by the handicappers will be in the superfecta most of the time. The other notes are the breaking ability and the average time of the last three races.

The second highest payoff of the night was in the 13th race. The selections were 4-1-5-2. Going back to the win percent, number one, 34.42; number two, 46.55; number four, 21.00, making #1, and #2 the inside team. I have number five from the outside, now I have to find the second number. Number six, 20.00; number seven, 18.86; number eight, 18.75. My outside numbers are #5 and #6, the ascendant is at 19 degrees of Leo, the midheaven, 14 degrees of Taurus, this gives preference to the may dog - #6. Number two and five are April greyhounds. So the decision is to go with the two astros on the outside.

I like number seven because of his astro aspect. Being that I'm uncertain about 1-4 in the superfecta, I only invest \$4.00, and take the 56/7/568/568. The result...5786, paying \$7,323.80. The astros ended up hitting 13 superfectas. Out of 15 races the program selections pick 13 winners, including the pick-6. When playing the quinelas, by taking the inside team with the outside team, this only going to cost \$8.00 per race. To play a pick-3, using your winning team is also going to cost \$8.00 for a \$1.00 ticket. Playing a trifecta with your winning team, the second team second with all in third position, is \$24.00. With a pick-6, your winning team in each of the six races would cost \$128.00.

Recaping my strategy, I look at the program selections, mark all the ones that already have two selections from 1-4, and two selections from 5-8. Those races that don't, I use the selections and narrow them down by percentage of wins for the two insides and outsides. After this information is compiled, I draw up a chart for the time and location of the race. If the greyhound's natal Mars is on the ascendant, or the natal sun is on the ascendant, midheaven, or descendant, this qualifies as an astro dog.

The Night of Stars program does not provide the exact birth date of the greyhound, so you have to base the month with the most days covering that sign, as the birth month. Capricorn...for example, would be January, because you have 23 days, versus eight days for Aquarius. The next step is to determine the greyhound with the best bloodline for the distance.

THE MERCURY CONNECTION

This publication is dedicated to the person who likes to go to the track occasionally, without having to do a lot of handicapping. All you need is an Ephemeris or a moon calendar. The Mercury Connection is based on the numbers 3 and 6, three coming from the third house of Gemini, and six coming from the sixth house of Virgo. Both of these signs are ruled by Mercury. For the Connection, the numbers that most often follow 3 and 6 are 1 and 2. The 1 and 2 are also connected to the sun and moon. Each race takes on the characteristics of what is known as a planetary segment. The day of the week ruled by Mercury is Wednesday, making it one of the best days of the week that the Mercury Connection will be dominate, followed by Saturday and Monday.

When using the Mercury Connection, all you have to remember are four combinations: 13/16/23/26. After the key is selected, you then combine it with the Mercury Connection numbers. Example: If the key was 5, and you were playing it in a trifecta box, your combinations would look like this: 135, 156, 235, 256...this would cost you \$24.00. To play ten races like this would cost you \$240.00.

If playing a partial quinela and trifecta, your trifecta bet would be 12/36/5, 36/12/5 - quinela...5/1236...this would be a \$16.00 bet. If you were playing a superfecta, you would have to use ALL (A) at the back end. This would cost \$120.00, or you could use a key and have four \$24.00 boxes. Example: With #7, you will usually find #5 in the superfecta, so if we add #7 to our bet, the \$24.00 boxes would look like this 1357, 1567, 2357, 2567...for a total cost of \$96.00.

In order for a race to qualify for a Mercury Connection play, it must have at least 50% Mercury hits from the last four segments. Days when the moon is in the mutable signs of Pisces, Gemini, Virgo, and Sagittarius are your best days to play the Mercury Connection, also during the New and Full moon, and when Mercury is aspected to the moon, or it is a Mercury segment.

At this point, you might be a little confused, so let me walk you through the seventh race from the Sanford-Orlando Kennel Club, going back four Saturday's with the evening program. If this was a matinee race, you would then use the four matinee races from Saturday. The first Saturday going back we have 6-2-3-7, next we have 3-5-2-7, next is 1-4-2-8, the next is 1-3-6-2. Three of these last four Saturday's we had a Mercury Connection in race seven. Numbers that were 75% or better in the top four were 2 and 3.

I would consider one of these numbers as my key for the seventh race in the fifth week. By doing this, I was able to use two keys, which were 6 and 7. My trifecta tickets were with #3 as a key...the combinations...137, 136, 237, 236. As you can see from the results, the order of finish...3-6-1-2. My \$1.00 superfecta ticket received half of the \$13,731.60. The trifecta ticket of 1-3-6 paid \$2,736.80.

All you have to remember is to go back four weeks at a time, write down the top four finishes. If it's a Monday, you take the matinee and go back four matinee races in the same race. If it's a Monday evening race, you go back four evening races, and do the same. Each race has its own planetary segment and will generate the key numbers.

SUPERFACTA — 3-6-1-2 — Paid \$13,731.60										

Using numbers 4, 5, 7, 8 as keys, make note of the top four numbers that hit in the race prior to the race you are playing, two of the four numbers in the finish have a high percentage of returning to the next race. When playing the Mercury Connection in a pick-6, you have the option of keying in - as one of your sets - 13/31 - 23/32 - 16/61 - 26/62. By doing this, you can bring in two numbers from each race, instead of costing you \$128.00, it would cost you \$32.00 with the Mercury key, which has a very high percentage of coming in during a Mercury segment.

A few of the pick-6's that I've hit using this method, you will find on June 28, 1985, March 5, 1985, February 7, 1987...etc. Close to \$1 million came from this \$32.00 wager. When playing a twin-tri, I take the four boxes, with a cost of \$24.00, then I take those four boxes and place them in a \$3.00 straight. If the straight hits, I will have four combinations that I will use to play the Mercury Connection in the second half. If I only hit on a box, then I will take the best combination.

Another play would cost me \$37.00. I would attempt a straight wager at \$25.00, a \$1.00 box, and then the top two astros with ALL (A), but this bet does not always work, as you can see from the two misses that I had on January 2 and 3, 1995. My straight ticket was 1-4-6, instead it came in 4-1-6, leaving me one exchange. Had I had all 26 exchanges, I would've picked up the jackpot. On January 3, I had 2-4-6, it came in 2-6-4. My exchange ticket...2-4-3, it came in 4-3-2. Both sides were Mercury, but I missed it by trying to get all the combinations covered in the second half.

With the tri-super, the strategy is almost the same, with the exception of the second half. You will still have your exchange tickets, but in the second half, you'll be adding a fourth contender. With the Mercury Connection, you have already tied up five contenders, leaving you three out of eight contenders. By back tracking the top four, you can check if any of those numbers qualify from the three, and also using the prior race factor. If it does, then you can use that contender in fourth position.

If you determine you want to stay with the top five, then you can use one of the final two from each group. Example: If we have 2-3-5, this leaves us 1 and 6, so you would choose one. May 4, 1987 at the Biscayne Kennel Club, with a pool, just under \$100,000.00, we used this formula, and won \$48,004.60 (The W-2 form is enclosed).

You are now probably wondering...How can I put them in exact order with out handicapping? The concept is almost the same as the lottery. Of the contenders that you are using, you make note from their past performances, who has the highest percent of wins, places, shows, and fourths. The odds tell us that the number that wins the race in the prior performance will not come back to win again, and the number that wins the race prior to the race on race day does not come back to win. You then check the numbers that have come in to win second, third, and fourth to determine the odds of them returning. This you only have to use in twin-tris and tri-supers.

Let's back track over the past few years, with the Mercury Connection. I will use the tickets and W-2's that were enclosed from the chapter The Mercury Connection, in the book The Jack Gillen Seminars - 35 Years of Research and Development, published in 1994. Using 1988 as my first illustration, you will notice that my Mercury Connection plays focused on races 2, 7, and 13, and race eight was used a few times. The days that are most dominate for the Mercury Connection are Monday's, Wednesday's, and Saturday's. As you can see from the W-2's, the majority of the wins came from these days. You will find race patterns that will allow you to play only those qualified races in the Mercury Connection.

The only time I play trifectas is in the twin-tri's, both the one's I hit - requiring a W-2 - were on Saturday, January 16, and February 13. Two Mercury twin-tri's were hit on Wed., July 20, and Thu., August 25. The pick-8 that I hit with the Mercury Connection was on January 9, March 17 and 19, and November 18.

The Double Quinelas that I hit with a Mercury were on February 10 and 17, and under Virgo in the month of September - on the 5th, 10th, and 14th. All of these Mercury plays of 1988 produced winnings of \$161,510.50. This cost to play these Mercury Connection...\$9,834.00...leaving a profit of \$151,676.50.

MERCURY SUPERFECTAS - 1988

Tu	4/12	2	F	11/4	2	Th	12/22	7
W	5/4	13	M	11/7	7-13	F	12/23	7
S	6/4	2	Th	11/10	7			
W	6/8	2	S	11/12	7			

With 1989, I want to illustrate how I use the key and the boxes. The January 28, April 10, and June 16 ticket cost \$120.00 each, using the Mercury Connection with all. July 13, the original key was #7, number 2 was added to each box. July 15 with 1-3-7, #8 was added to the box. July 17, 2-3-4, #7 was added to the box.

August 23, 1-6-7, #4 was added to the box. Each of these races consists of four boxes at \$96.00 each. There are times when I can hit on a \$24.00 box if the pattern indicates two cold Mercury numbers, like a 1-6, and I know that #7 will be there, I might purchase a 1-5-6-7 box. As you look over the rest of the winning W-2's, you will notice that some races I stay with, or I might pick up a new race, like the fourth race. Look at the tickets from 1992. Some combinations will hit exact under the same moon sign. February 3 and March 30 both had the moon in Aquarius, and the winning numbers 3-4-2-7 in each race.

Number 4 followed by #7 then, #8 and #5 are most likely to follow in with the Mercury pattern. At my local track, the superfecta pools are from \$5,000-7,000, therefore, it does not allow for many players. This is why, when developing a racing program, it has to be limited per track. The Mercury Connection allows you to play selective races without worrying about a diluted pool. From the W-2's, you will be able to get a deeper insight into the winning factors, that can help bring the bet down by using stats.

For instance, in race seven, how many times is it higher or lower on Tuesday, than on Monday. If I know it's going to be lower, I key in the favorites, if it's going to be higher, then I leave out the favorites. For the astrology student, you can use the W-2's up to 1994 to work out the aspects for the high and low payoffs.

Final Notes

I have added two pages of W-2's since the Mercury Connection was published in 1995. In 1996, I hit a few Mercury tri-supers and wanted to bring one of them to your attention. Remember that I mentioned, when the moon is in Aquarius, the 2347 is a strong Mercury combination. If you look at my W-2 from August 26, 1996, you can see my exchange ticket was 3274, worth \$34,901.80. The superfecta on September 1, paid \$25,000.

In my book, The Key to Speculation for Thoroughbred Racing, the \$3 million in pick-6 checks and W-2's, 30% of those winnings were with the Mercury Connection, and you can do the same thing in the twin-tris and tri-supers, by taking one of the 13, 16, 23, 26. The same way as the pick-6.

Seventy percent of my big wins have been with tickets under \$64.00. If you are playing with a large crowd, you can increase the wager to cover other combinations, but sometimes playing with a lot of people, something can go wrong, due to someone in the group having a bad chart. The other W-2 page that I enclosed from 1993, is to explain why you cannot have too many people playing the same track.

I have received over \$5 million worth of W-2's from subscribers. I was originally going to do a book on how our subscribers use our information, and the story of their wins. As it ended, there was no interest in this type of book, but the research did pay off. At Saratoga, August 19, 1993, our Mercury Connections were all long shots. The \$1.00 ticket paid \$1,082.00. There were close to 97 people who played, 26 of them send us their W-2's. On September 18, 1993, we hit the pick-6, but with too many subscribers playing, it only paid \$782.00.

Since the Florida lottery was introduced in our state in 1988, I have noticed a decrease in participants at our local track. Remember, in using the Mercury Connection, check the average payout for the trifecta at your track to determine if it is worth the wager, and by going back over the races for the last four weeks, let your predictions flow from that.

This publication is for entertainment purposes only. Use it to it's full potential by making reservation for lunch or dinner at your favorite track, while you play the Mercury Connection.
