Instructions On Using Your New ART® Scanner:

The ART® Real-Time Market Scanner utilizes the sophisticated and efficient NinjaTrader's Market Analyzer™ that is a turbo-charged quote sheet window with multi-instrument real-time scanning and analysis with access to over 100 pre-built indicators and data columns.

The ART® Real-Time Market Scanner requires the free NinjaTrader charting platform. Free download included with order. You do not need the ART® Software to use this scanner, but this scanner will not indicate actual ART® Signals on the NinjaTrader chart, for that you do need the ART® Software as well.

Operating & Accessing the ART® Scanner in NinjaTrader's Market Analyzer:

Start NinjaTrader

Open Market Analyzer (File->New->Market Analyzer)

Add symbols (Right click-> Add Instrument List->DOW 30)

Open the "Columns" window (Right click->Columns->Select "ART® Scanner"->New->Adjust Variables.

Alternate (this is another option) way to load ART® Scanner: Open "ART template" (Right click->Template->Load "ARTScanner"

To configure the ART® Scanner parameters/variables, Right click->Columns->Select ARTScanner, see the parameters in the right side)

To configure Market Analyst Scanner Properties: Right click->"Properties"

Please be sure to view the ART® Scanner instructional demo video for a visual demonstration of how to operate the ART® Scanner.

Since data can vary between data providers, and charting platforms can load differently, have different data settings such as start and end times, tick representations, etc. you may see some variances between what the scanner indicates and what you see on your own chart. Adjust the settings in either your ART® Scanner or on your charts to bring them into alignment.

The ART® Scanner is very dynamic and there many settings that can be adjusted to meet your needs. Below is a list of ART® Scanner variables that you can change.

ART® Scanner Variables:

- Filter: Minimum Price (Numeric) Filter: Maximum Price (Numeric)
- Filter: Bracketed Size (%) (Numeric 0.001 - 40)
- Scan: Bullish (True/False) Scan: Bearish (True/False)
- Scan Type: P (True/False) Scan Type: MP (True/False)
- Scan Type: Confirmed Only (True/False) Scan Type: 1B (True/False)
- Scan Type: 2B (True/False)
- Scan Type: Consecutive P (Numeric 1-12) Scan Type: Bracketed (True/False)
- Scan Type: Breakout (True/False)

The results will be shown as text on the ART® Market Analyzer like: "Bull P, Bull 1B, Bear MP, Unconfirmed Bull P, Bracketed"

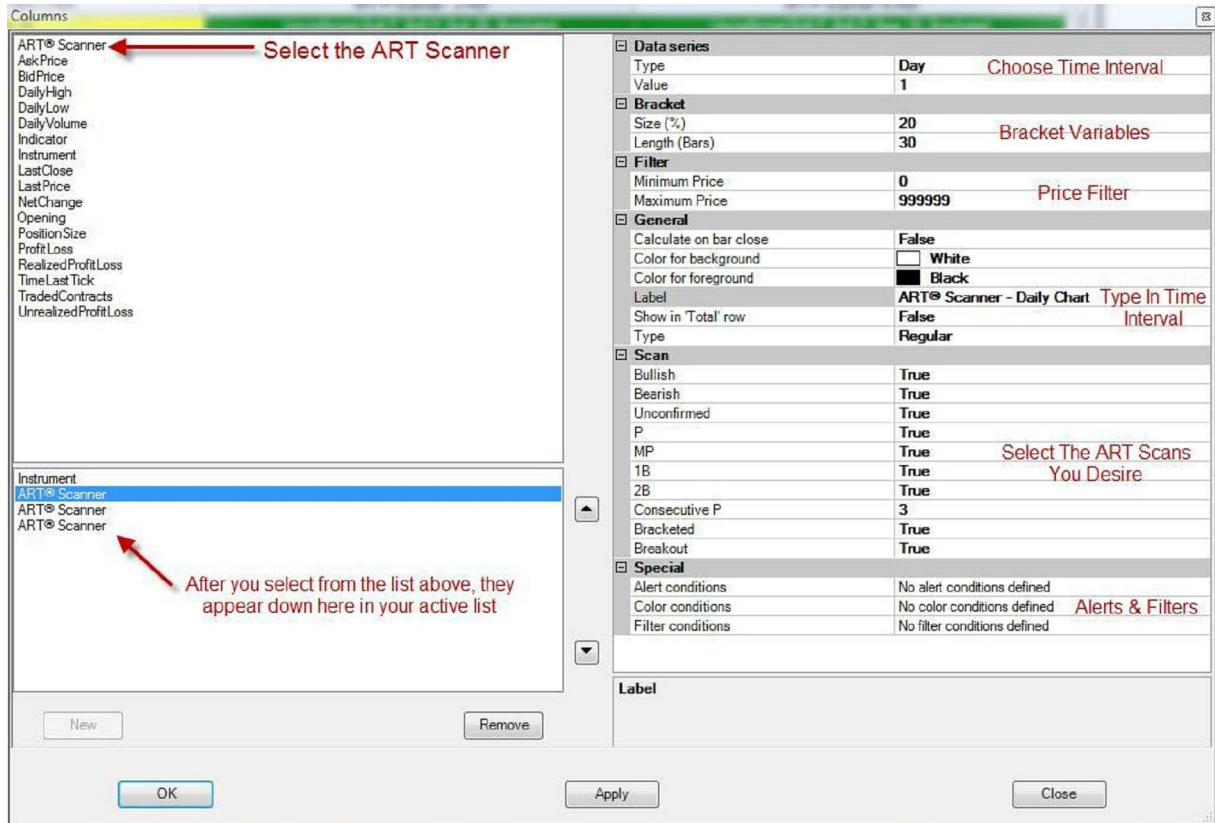

There are many variables or settings that can be adjusted and add customization to your scanning results. Some of these variables are inherent to the ART Scanner itself while others are inherent to Market Analyzer. Learning to adjust these variables will allow you to use the ART® Scanner to its fullest capacity.

It is important to note that a change in any one variable can affect your scanning results so you will need to test the different combinations until you get the desired results.

To Access These Settings:

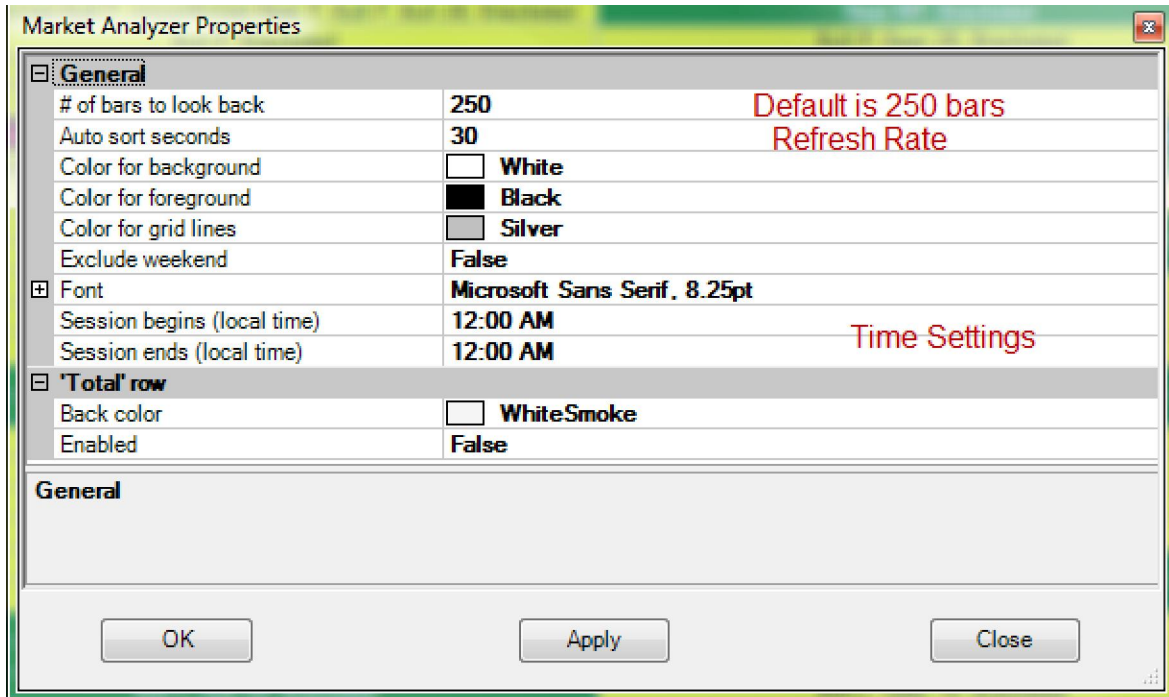

Columns Window

Right click on the scanner and choose "Columns". The "Columns" window appears as illustrated below. From here you can select the variables you desire.

Properties Window

Right click on the scanner and choose "Properties" . The "Properties" window appears as illustrated below. From here you can select the variables you desire.

ANDREYBBRY@GMAIL.COM SKYPE: ANDREYBBRY

Colored Columns

The ART Scanner colors the columns based on bullish, bearish, or neutral confirmations and makes these determinations based on the most recent ART "P" Pyramids.

Green Colored Column: Bullish Trend

Red Colored Column: Bearish Trend

Yellow Colored Column: Neutral Trend Position. You would be flat the market, neither long nor short. It is important to understand the Neutral yellow columns mean the last "P" Pyramid was stopped out.

TradersCoach.com® Software Updates:

TradersCoach.com® Software updates will be announced at the TradersCoach.com® FORUM. [CLICK HERE](#) to access this Forum, and register now as a member so you get notified upon any updates that become available. Registration is free.

TradersCoach.com® Software updates will be available to download from the TradersCoach.com® website.

Technical Support:

If you need technical support, [CLICK HERE](#) and use the TradersCoach.com® FORUM to post any questions you may have. Also before posting your question, read posts from others for answers to your question. If you don't see an answer to your question, then go ahead and post your question and our technical support team will answer you quickly. The FORUM is the first and quickest way to get answers to your questions. If our technical support team needs to remote into your PC to assist you, we can do that but only after you have tried to get help via the TradersCoach.com® FORUM.

Questions & Answers:

Let's say I want to scan for "Bracketed" markets only on a long list of stocks BUT I only want to see the list of stocks that show True for "Bracketed" markets. In other words instead of having to go through each stock to see if it was "Bracketed", can just see the list of "Bracketed" stocks only?

Answer: Not in that fashion, but you can sort based on the column and you will see the Bracketed float to the top, sort by click the column header, turn Auto Sort = true in properties.

I noticed on the "Market Analyzer Properties" window a "session begins (local time)" & "session ends (local time)". Is there a way to assign different start and end session times per Instrument instead of assigning a start and end session time for the entire Instrument List? This would be handy if you were analyzing a list of futures markets where you did not want the overnight data to be included (because of low liquidity) in the scan but did want it on some futures markets where you want to scan overnight data?

Answer: Not in that fashion, but you can open multiple Market Analyzers each with its own setup.

Is there a way to add a Custom Instrument List instead of just adding individual Instruments and then not being able to save them as a new Custom Instrument List?

Answer: Yes, see the Tools->Instrument Manager->Left side area, look for the New button.

I have purchased the ART® Scanner. does switching over to NinjaTrader a better choice than continuing to use my current charting platform that I am using the ART® Software?

Answer: Here is what we recommend. Stay with your current charting platform if you like it and see how you like using both the ART® Scanner using the NinjaTrader Platform and current charting platform side by side. You can use the free version of NinjaTrader and connect NinjaTrader to your data (providing it is on NinjaTrader's Data/broker compatibility list) so basically it will not cost you anything to run the two platforms side by side. You will need to have both your current charting platform and NinjaTrader running at the same time. You can move the interface of the ART® Scanner around and have it right next to, or on top of your current charting platform's chart charts so it will seem like it is part of your current charting platform. Try that and see if you like it, if not you can always switch later on.

I don't see the ART® Scanner in the Market Analyzer when I click on "Columns"?

Answer: You first need to download and install the ART® Scanner. Then restart your NinjaTrader Platform and navigate to the Market Analyzer, it will then be there in the "Columns" window labeled "ART® Scanner".

I downloaded and installed the ART® Scanner but I am not activated to use it. What do I need to do?

Answer: You need to purchase the ART® Scanner from TradersCoach.com. [CLICK HERE](#) to purchase. Then you need to register it so we can activate it for you using your NinjaTrader Machine ID #. [CLICK HERE](#) to register. You can find your NinjaTrader Machine ID # by ->Help->About.

Can I create my own "Instrument Lists" in Market Analyzer? I want to scan my own lists or perhaps the entire stock market. Can this be done?

Answer: Yes. Users can create their own instrument lists and then selecting the entire list to load into the Market Analyzer.

Instructions can be found here:

<http://www.ninjatrade-support.com/HelpGuideV6/InstrumentLists.html>

Users can also import a list of stock symbols using the instructions here: <http://www.ninjatrade-support.com/HelpGuideV6/ImportingAListOfStockSymbols.html>

Is there a way to quickly import symbols into the "Instrument" column or do I have to do this one by one? There needs to be fast way for me to load a long list of symbols.

Answer: Yes, this can be done by right clicking on the market analyzer and then go to 'Add Instrument List'.

Further instructions can be found here:

<http://www.ninjatrade-support.com/HelpGuideV6/AddingRemovingInstruments.html>

How do I move certain scan results to the top of the list? For example if I am scanning for three different set-ups, how do I isolate one of those three and bring them to the top of the list so I can easily find them and so I do not have to scroll through the entire list one by one looking for it?

Answer: Sorting through the scans can be done by clicking on the column you wish to sort and the scans will be sorted by Ascending or Descending order.

More instruction can be found here:

<http://www.ninjatrade-support.com/HelpGuideV6/DynamicRankingAndSorting.html>
